

Images Designs Animation

Here's a new animation from the **Hidden Images** series published by Running Press, in Philadelphia, USA. These are some images seen in **Design # 1** from the title, **Garden**. The animation was prepared for the Spring 2012 Young Inventor class.

The images seen in the design animated below were found and colored by different children and adults. What can you see in the design (stop the animation when just the design can be seen)? Try to forget the images seen by others and relax your vision and let your imagination wonder. Some people see patterns, others see animals and people, others see complete scenes. Whatever images you see will be original and unique to you! The **Hidden Images Garden** title can be found on **Amazon** – see the link on the **Images Page** of this website.
