

Lectures: Geometry to enhance the human experience

My latest book, "3D Thinking," to be published by Thames and Hudson Spring 2017 forms the basis for a new exhibition and lecture series, see below. Lectures feature photos, illustrations, movie clips, animations.

Please see my pages, "Presentations" and "Workshops" for descriptions.

Presentations include:

The Golden Ratio – A Divine Proportion? Presented at the Leonardo Science and Technology Museum, Salt Lake City, March 2016.

The Future of Architecture. Presented at the Leonardo Science and Technology Museum, Salt Lake City, April, 2016.

Shape Changing Polyhedra. Presented at the Bridges Conference, University of Jyväskylä, Finland August 2016.

Arabian Geometries.

The Pythagoreans.

A Dynamic Close-Packing Sphere Geometry. A unique new lattice generating geometry for architecture, design, science.

Labyrinths – Mysteries and Methods.
