Think 3D – Update

Have completed the new chapters – the Renaissance and the River Valleys (Euphrates, Tigris, Nile, Yellow, Indus). The new material took longer to create than I thought. Have been working through the illustrations and securing rights for photos when needed. After that the index will need to be completed…The final page count will be just about 360 + pages.

Some of the material that appears in the book will be exhibited in an upcoming exhibition at the Leonardo.
