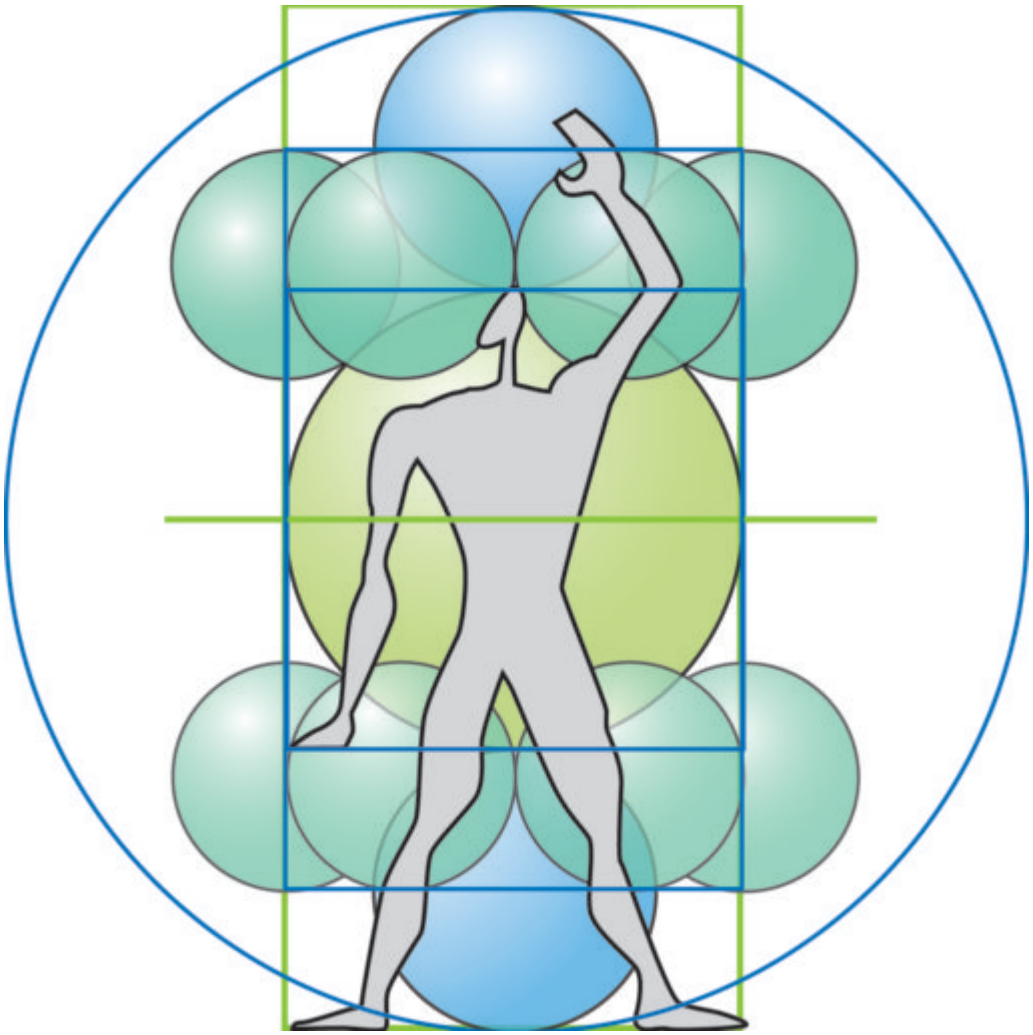
Geometry New Golden Ratio Icon


This new rogerburrowsimages.com icon shows the relationship between Le Corbusier's 'man' and the "Golden Sphere" packing generated by the author's "Dynamic Sphere" geometry. The packing generates three-dimensional "ideation lattices" from which design, art, and architectural forms can be extracted. As much as DaVinci'e "Vitruvian Man" represents a "whole number" proportionate system that dates back to ancient Greece and ancient Egypt the new icon represents a three-dimensional, "Golden Ratio" proportionate system.
