

Myths and Facts, The Great Pyramid

Announcing the 6th Supplement to "Visual Thinking, Seeing Through Time," Book 1. Now added to the SUPPLEMENTS page.

This supplement examines common myths about the Great Pyramid of Giza. It focuses on numerical claims such as the golden ratio and π . It contrasts these with the true achievements of the ancient Egyptians.

Cheops is the largest of the Giza pyramids. In this illustration it is further away than Menkaure.
